QUONAIN EJAZ

SOFTWARE ENGINEER

Lahore, Pakistan • 0348-2449429 • quonainejaz123@gmail.com

SUMMARY

Software Engineer with 2+ years of professional experience building high-performance **web**, **mobile**, **and desktop applications**. Skilled in developing scalable front-end and back-end solutions using **React.js**, **Next.js**, **Node.js**, Express.js, MongoDB, **PHP/Laravel**, and **React Native**, with additional experience in cross-platform desktop application development using **Tauri and Rust**.
Experienced in building responsive user interfaces, reusable and modular components, **RESTful APIs**, **database-driven applications,** and end-to-end product features with a strong focus on clean, maintainable code, performance, and scalability.

WORK EXPERIENCE

Appliconsoft / Software Engineer — June, 2025 – Present

- Delivered and enhanced production-ready web and desktop applications using **Vite, Next.js, Vue.js, PHP/Laravel, Node.js, Tauri, and Rust** across diverse development projects.
- Built and maintained 3 Vite-based and 2 Next.js applications using JavaScript and TypeScript, focusing on **reusable architecture, responsive interfaces**, and maintainable code.
- Developed features across 3 PHP/Laravel applications and a Node.js application, strengthening backend functionality, **API integrations, business logic, and full-stack workflows**.
- Successfully migrated an existing Vite application to Next.js, restructuring the codebase while preserving core functionality and improving long-term maintainability.
- Expanded cross-platform development capabilities by contributing to **Vue.js and Tauri/Rust applications**, delivering solutions across both **modern web and desktop** environments.

Whetstonez / Associate Software Engineer — Dec, 2024 – June, 2025

- Developed and maintained 3 React Native applications for **Android**, building responsive interfaces, reusable components, and smooth mobile user experiences.
- Built application features using JavaScript and TypeScript, **integrating APIs, navigation, dynamic data, and core business logic**.
- Developed and enhanced **Chrome Extensions,** working with **browser-based functionality, user interactions, and extension-specific workflows**.
- **Debugged and optimized** mobile and browser-based applications, resolving UI, functionality, and performance issues for more stable releases.

Fulfilman / Technical Support Specialist — 2024 – 2025

- Provided **technical support and troubleshooting** for application installation, configuration, setup, and software-related issues.
- Managed **client onboarding**, application setup, account configuration, and system requirements for new clients.
- Diagnosed and resolved **software, configuration, integration, and functionality issues**.
- Configured third-party applications and services, including API integrations and **application integrations**.
- Built and maintained **workflow automations using Zapier** to connect applications and streamline business processes.
- Assisted clients with **system configuration, application setup, integrations, and technical issue resolution.**

EDUCATION

Bachelor of Science in Information Technology

- Graduated: 2024

Microsoft Azure Administrator Associate

- Completed: 2024

PROJECTS

- **Bizee Partner Platform:** Developed a **Laravel/PHP Partner API** and **Vue.js/TypeScript** portal for business formation and post-formation orders across across all **50 U.S. states**, ingegrating with Bizee's upstream Atomic API, atomic-resources, compliance-system, DSL, checkout, service-foundation within a **microservices architecture**. Implemented state-specific validation, **OAuth2**, **tenant isolation**, **webhooks**, and **Redis/Horizon queues** for secure asynchronous order processing and partner integrations.
- **Jobsite Sentry — Remote Monitoring & Surveillance Platform**: Developed a **real-time construction site monitoring and surveillance platform** using **React, Vite, Redux, Leaflet, and Recharts.** Built responsive dashboards and interactive interfaces for **live camera monitoring, multi-site visualization, geospatial mapping, monitoring data, and analytics.** Implemented **interactive maps, data visualizations, charts, monitoring dashboards, and state-managed workflows** to help users monitor construction sites and security operations. Integrated location-based functionality and visualization components to support **remote jobsite monitoring, site intelligence, camera surveillance, and operational reporting**
- **MyQuicks — AI Marketing Platform:** Developed and enhanced an **AI-powered marketing platform** using **Next.js, React.js, and Context API**, enabling users to generate and manage **AI-powered blogs, social media posts, captions, hashtags, keywords, images, and videos**. Implemented responsive and reusable UI components for content creation, brand management, social media scheduling, competitor analysis, and AI-driven marketing workflows. Integrated interactive features for **content generation, SEO optimization, brand voice customization, trend analysis, and multi-platform publishing**, delivering a scalable and user-friendly marketing experience.
- **EZPick — Student Pick-up & Tracking Mobile Application:** Developed a **cross-platform mobile application using React Native** during an internship to streamline and automate the **student school pick-up process.** Implemented user-facing mobile interfaces for **student attendance, location tracking, real-time pickup updates, notifications, and pickup status monitoring,** helping parents and school staff efficiently track and manage student pickups. Worked on **API integration, application state management, responsive UI development, debugging,** and performance optimization, contributing to a production-ready mobile application published on the Google Play Store.

SKILLS

- **Frontend Development:** React.js, Next.js, React Native, Vue.js, JavaScript, TypeScript, Redux Toolkit, Zustand, Context API, Responsive UI.
- **Backend & Databases**: Node.js, Express.js, PHP, Laravel, REST APIs, MongoDB, PostgreSQL, SQL, API Integration.
- **IT Support**: Technical Support, Application Support, Software Installation, System Configuration, Troubleshooting, Issue Resolution, Client Onboarding, Application Integration, Zapier Automation.
- **Cloud & DevOps:** Azure, Virtual Machines, Docker, Docker Swarm, Git, GitHub, Deployment, Server Configuration.
- **Software & AI:** Full-Stack Development, Web & Mobile Apps, Chrome Extensions, Cross-Platform Development, Debugging, Performance Optimization, AI-Assisted Development, Cursor, Claude, ChatGPT, Codex, Windsurf.
